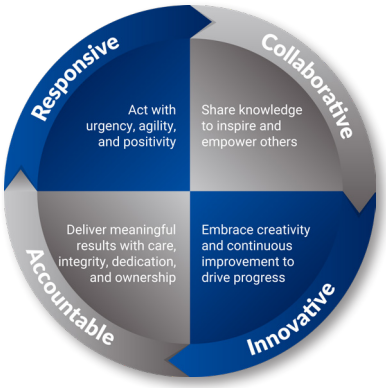
Introduction to Dynamic Ratings

Clear Insight. Confident Decisions. Reliable Assets.

Who We Are

Dynamic Ratings is a global provider of condition-based monitoring solutions for transformers, circuit breakers, switchgear, and control cabinets. We help utilities, industrial operators, and asset owners replace guesswork with evidence. By combining design information, operating history, inspection findings, test results, and real-time condition data, we provide a clear picture of asset health, performance, and risk. As a wholly owned subsidiary of Wilson Transformer Company, we pair decades of transformer manufacturing heritage with deep monitoring and diagnostics expertise. The result is a partner who understands electrical assets from the inside out, not just the sensors attached to them.



Our Mission & Values

Our mission is simple: help our customers achieve their goals. Every engagement starts with listening and understanding what a customer is trying to accomplish, whether that's improving reliability, reducing risk, extending asset life, or doing more with a leaner team. From there, we engineer a path to help them achieve those goals.We don't believe in one-size-fits-all products. We develop customized solutions built around each customer's fleet, priorities, and constraints, backed by expert-led service and a genuine commitment to our customers' long-term success.

From Local Innovation to Global Reach

Dynamic Ratings began in 1998 in Melbourne, Australia, with the DRMCC-T1, our first transformer monitoring and control system. We opened our U.S. office in 2002 and have continued to grow into a truly global organization, with dual headquarters in the United States and Australia, as well as additional offices in the United Kingdom, Germany, and Thailand.

Our growth continues today. Over the past year, Dynamic Ratings has expanded its physical footprint with new facilities in both Melbourne, Australia and Sussex, Wisconsin in the United States. This investment reflects our momentum and our commitment to staying close to the customers and industries we serve, wherever they operate around the world.

RESPONSIVE

ASSET HEALTH SOLUTIONS

Software & Services

DynamicMetrix®

Our software platform brings condition-monitoring data together into a single, actionable view, giving asset managers the clarity to prioritize maintenance and investment decisions with confidence.

LIFESTREAM® Support Services

Successful asset management is a process flow of planning, designing, managing, implementing, verifying, and supporting. Dynamic Ratings offers LIFESTREAM® Support Services to ensure successful asset monitoring throughout the entire life cycle of an asset. LIFESTREAM® Support Services include:

Expert Insight, Without the Overhead

Dynamic Ratings provides utilities with a clear, evidence-based understanding of asset health, performance, and risk without requiring a dedicated internal monitoring team. By integrating design information, operating history, inspection findings, test results, and advanced condition-monitoring data, we look beyond assumptions based solely on asset age to identify degradation mechanisms and emerging faults early. The result is an actionable condition report that improves reliability, optimizes lifecycle costs, and strengthens asset management outcomes. This approach is ideal for cooperatives and municipalities seeking cost-effective, expert insight to extend asset life while making the most of limited internal resources.

Industries We Serve

TRANSMISSION & DISTRIBUTION | GENERATION | RENEWABLE ENERGY | DATA CENTERS | INDUSTRIALS & MINING | BATTERY ENERGY STORAGE SYSTEMS
