

Top Oil Temperature Magnetic Mount Sensor

Magnetic Top Oil Temperature Sensor provides a quick and easy method of measuring transformer and/or LTC temperature

FEATURES

- The standard 3-wire assembly provides a compensated signal which is unaffected by the length of the lead to the control system
- The Spring Loaded design ensures positive contact of the measurement probe to the tank wall
- Extremely strong 200# Pull Magnet ensures that the sensor remains in place with no need for adhesive
- Aluminum Power Coated Enclosure provides protection from corrosion
- Available with ½" NPT fitting or with 24' of SJT Weather Resistant Armored Cable

ORDERING INFORMATION

Part #	Description
SE-011	Mag. Mount RTD-with ½" NTP Fitting
SE-012	Mag. Mount RTD-with 24' Stainless Steel Armored Cable

SE-012 with Armored Cable
